<b>ANNOTATION</b>	188
<b>INTRODUCTION</b>	189
<b>PART I. GENERAL PHARMACEUTICAL CHEMISTRY</b>	
1.1 Introduction to Pharmaceutical Chemistry	192
<b>PART II. PHARMACEUTICAL CHEMISTRY OF SYNTHETIC DRUGS OF SOME GROUPS</b>	
2.1 Inorganic drugs. Drugs based on VII, VI groups elements	200
2.2 Pharmaceutical preparations based on V, IV and III groups elements	208
2.3 Pharmaceutical preparations based on II, I and VIII groups elements	213
2.4 Carbonic acid amide derivatives - pharmaceutical preparations	221
2.5 Carboxylic acids among aliphatic series and their derivatives	224
2.6 Ethers and esters	225
2.7 Halogen derivatives of alkanes	230
2.8 Preparations based on aldehydes and carboxylic acids	233
2.9 Amino acids. Natural $\alpha$ -amino acids	237
2.10 Derivatives of amino alcohols in aliphatic series	239
2.11 Phenols and their derivatives	243
2.12 Aromatic acids and their salts	247
2.13 Salicylic acid and its derivatives (Acidum salicylium)	253
2.14 Drugs based on heterocyclic compounds	264
<b>PART III. BIOLOGICALLY ACTIVE NATURAL COMPOUNDS USED AS DRUGS</b>	
3.1 Terpenes	274
3.2 Alkaloids	279
3.3 Glycosides	299
3.4 Vitamins	303
<b>ADDITIONAL MATERIALS</b>	
Control questions	324
Test questions of final control	327
