

APPROVED

Rector of the PI “Bolashaq” Academy”

Adanov K.B.

06 2026

## QUALITY POLICY

“Bolashaq” Academy” combines flexible management and educational strategies with a focus on high-quality training standards for specialists for the “democratic, legal, secular, and social state of Kazakhstan”.

“Bolashaq” Academy” strives to integrate modern educational technologies, develop research activities, and create a competitive academic environment that meets its stated mission and the current needs of Kazakhstani society and the labor market.

“Bolashaq” Academy” Quality Policy is focused on strengthening its scientific and educational infrastructure through the development of research activities and the expansion of the range of educational programs offered at the undergraduate and graduate levels. Implementation of these strategic directions creates the institutional preconditions for a gradual transition to a university-based model for organizing educational and scientific activities.

The qualitative indicators of the strategic development of the Academy are:

- Expanding the range of educational programs offered;
- Increasing the proportion of master's students in the student body;
- Implementing joint educational programs with top-ranked universities in the region and Kazakhstan;
- Strengthening competitive positions through national rankings;
- Consistent development of institutional potential;
- Developing an educational environment that integrates AI/artificial intelligence technologies to improve the quality of education;
- Expanding academic autonomy;
- Creating a practice-oriented educational environment;
- Developing international cooperation;
- Attracting foreign faculty and researchers to educational and scientific activities, including joint innovative projects and start-ups;
- Strengthening the research component of the educational process;
- Developing mechanisms for the commercialization of scientific and technical developments through expanded interaction with businesses, companies, and foundations;
- Increasing the publication activity of faculty by increasing the number of scientific publications in journals indexed in international databases Web of Science (Clarivate Analytics) и Scopus.
